Economic diversification

The WA Government released [Diversify WA](#) to provide an economic development framework for the State. It sets out initiatives, actions and strategies that will contribute to achieving its vision for a strong and diversified economy delivering secure, quality jobs through increased investment across a broad range of industries. It also identifies priority sectors for strategic development that match WA's unique strengths with global trends to achieve growth across the economy.

The Diversify WA: Supply Chain Development Plan 2021-22, identifies key supply chain opportunities across a number of the priority sectors and builds on the commitments outlined in Diversify WA.

Building on Diversify WA, Future State provides 9 targeted, sector-specific diversification opportunities that have been identified based on their alignment with key global trends, potential for strong economic and social benefits, synergies with existing government commitments and industry investment and capability.
